

Mean extinction time τ

- $\alpha = 1.245$ (sub-critical)
- $\alpha = 1.557$ (critical)
- $\alpha = 1.868$ (super-critical)

$\tau \propto e^{1.19\Delta}$ (exponential)

marginal

$\tau \propto \Delta$ (polynomial)

Barrier height $\Delta = \log(y_0/y_{\text{ext}}) \sim \log N$
